Eric,

This is acceptable.

David

Subject: D4634-143/-141

Good Morning David

We have found our first little hiccup on the interiors this morning. Daryl pulled D4712-1 Rev B from stores and bonded it into place. On D4634-143 & D4334-141

The only changes I can see are the size of the holes. The rev b part have a 0.098" hole and the rev c has a 0.129" hole other than that I don't see any other changes in the two rev's.

To make it work the 0.098" holes will have to be transferred drilled, deburred, and touched up neatly with alodine as per QSI 005.

The reason for this was due to the rev B parts were still in stores and hadn't been pulled out let. Daryl had pulled his parts out of the stores department to get a jump on assembling the panels last week before any drawings ,ECN's were sent out.

Will this be acceptable?

Please let me know.

Thanks David

Eric Downing
